

We are a middle-sized enterprise in the sector of wastewater, water and environmental technology. Located since 10 years in Putzbrunn in the east of greater Munich and additional sites in Beyharting and Kirn-Sulzbach. We are designing and realizing water and wastewater treatment plants for our international clients.

We are currently looking for an experienced technical supervisor and site manager in the sector of plant construction.

## **Technical Supervisor as freelancer for the Construction of Plants**

### **YOUR RESPONSIBILITIES AND TASKS:**

- » Assembly of equipment, pipes and supports and instrumentation abroad
- » Acceptance of deliveries and organization of construction site logistics, based on our parts lists and packing lists
- » Guidance of local assembly teams, cooperation with project partners (civil, electrical etc.)
- » Preparing and supporting assignments of commissioning process and automation engineers
- » Status reporting to project managers
- » Proposals for improvement to technical department or project management

### **WE OFFER:**

- » An innovative and diversified field of action in the sector of environmental protection
- » An activity with foreign assignments of usually up to six weeks
- » An office workplace at one of our German locations, alternatively if necessary home office

### **YOUR PROFIL AND QUALIFICATION:**

- » Successfully completed technical education or comparable qualification
- » Professional experience, preferably in project business / plant construction
- » Handling of assembly drawings P&IDs, parts lists, packing lists
- » Practical knowledge in written and spoken English, other languages very welcome
- » Experience in steel and polyethylene welding as well as PVC-glueing, willingness to develop
- » Enjoy working together in international teams

**Did we spark your interest?** Then please send us your application incl. curriculum vitae with information about your availability and with your financial expectations (per day/month) either by post or by e-mail.
